

# WISELIFE - PRODUCT BACKLOG

The current product backlog is shown here, it includes the user stories for the MVP and for the first 3 increments, which are represented as Jira Epics. The order is based in the sequencer waves (see below) designed during the lean inception process. Stories that are part of the same feature were tagged with the same Jira "label" data field. This is shown in more detail after the full backlog presentation.

## Sprint 01 (MVP planned):

These are the user stories planned for the 1<sup>st</sup> sprint.

WL-30	AS A money spender, I WANT to configure a daily alarm for the daily review IN ORDER TO guarantee that I won't forget to do it every day	MVP	-	==	TO DO	AM
WL-31	AS A money spender, I WANT to automatically load standard monthly expenses for several months in advance IN ORDER TO avoid this repetitive work every month	MVP		==	TO DO	AM
WL-43	AS A money spender, I WANT the app to automatically build a frequently used expense list IN ORDER TO to save time when using it for expense addition	MVP	0	==	TO DO	AM
WL-42	AS A money spender, I WANT to quickly add a pre-registered expense selected from an automatically built "most-frequent" expense list IN ORDER TO consult and analyze it later	MVP	-	==	TO DO	AM

## Backlog (increments):

These are the remaining stories in the backlog, distributed among increments 1, 2 and 3.

WL-32	AS A money spender, I WANT to create a custom expense tags IN ORDER TO track related expenses across multiple categories	INCREMENT 1	TO DO	AM
WL-33	AS A money spender, I WANT to see and order my expense totals by tag IN ORDER TO to know where I spend the most	INCREMENT 1	TO DO	AM
WL-34	AS A money spender, I WANT graphical options to see tag totals analysis IN ORDER TO facilitate my interpretation over the data	INCREMENT 1	TO DO	AM
WL-35	AS A money spender, I WANT review and edit my monthly expenses pre-load list IN ORDER TO update only subsequent months	INCREMENT 1	TO DO	AM
WL-36	AS A money spender, I WANT to configure an expense limit IN ORDER TO consistently save more money over time	INCREMENT 1	TO DO	AM
WL-37	AS A money spender, I WANT set up saving alerts IN ORDER TO warn me when I reach significant expenses milestones through the month	INCREMENT 1	TO DO	AM
WL-38	AS A money spender, I WANT to simulate credit expenses over future months IN ORDER TO know if I'm able to honor them	INCREMENT 1	TO DO	AM
WL-39	AS A money spender, I WANT credit expense simulations to alert me when the savings target is broken on future months IN ORDER TO speed up my decision process over taking that expense	INCREMENT 1	TO DO	AM
WL-45	AS A money spender, I WANT to add a full expense by using an interpreted audio command IN ORDER TO consult and analyze it later	INCREMENT 2	TO DO	AM
WL-47	AS A money spender, I WANT the option to use my geolocation to auto-fill some fields when adding an expense IN ORDER TO adapt it to my needs	INCREMENT 2	TO DO	AM
WL-44	AS A money spender, I WANT to be able to customize my own expense addition screen IN ORDER TO adapt it to my needs	INCREMENT 3	TO DO	AM
WL-46	AS A money spender, I WANT to add an expense using my customized expense addition screen IN ORDER TO consult and analyze it later	INCREMENT 3	TO DO	AM
WL-49	AS A money spender, I WANT the option to save created custom filters for the expense review list IN ORDER TO save time the next time I need to use them	INCREMENT 3	TO DO	AM
WL-50	AS A money spender, I WANT the option to create custom filters for the expense review list IN ORDER TO adapt it to my needs	INCREMENT 3	TO DO	AM

## Project Features as Jira Labels:

As stated before, Jira labels were used to identify the project features and they can be used to search and find all user stories that comprise a single feature. For example, stories WL-25, 26 and 27 all belong to the “Analysis by time” feature and were labeled accordingly, as shown below:

WL-11 / WL-25
